

TM Construction Hawaii

The Only Thing More Solid Than Our Product is Our Integrity.

CONCRETE PAVEMENT AND RUNWAY MAINTENANCE AND REPAIR

EXPANSION AND JOINT SAWING AND SEALING

TM Construction Hawaii is a general contracting firm. One of our specialties is concrete pavement and runway maintenance and repair. Well maintained airport concrete pavements for runways, taxiways and apron areas can provide excellent long-term performance under a range of operational and site conditions. With most Hawaii airports operating at capacity, they cannot afford to have poorly performing pavements and risk gate closures or reduced landing or takeoff capacity. Similarly, at military airfields, the need for operational readiness mandates pavements that perform well over the expected service life of these pavements. Aging infrastructure and civil works are a huge problem, with many structures still in use long after their original designed functionality and service lifespan.

Likewise, streets and roads, highways, ramps and shoulders, sidewalks, and parking lots require professional concrete repair and maintenance. Without proper maintenance, structures can become both a safety and financial liability.

With our unique climate and temperatures, Hawaii roads and runways present unique challenges. TM Construction Hawaii is experienced and capable to saw cut, clean and prepare the joints for the installation of sealants from various manufacturers (like Pecora, Sika, D.S. Brown, BASF and Watson Bowman). We choose the right materials for the job. Our comprehensive services include the disposal of wastewater and elimination of the need to maintain the condition of the joint between saw cutting and the installation of the sealant

US Army Corps of Engineers®

– because we cut, clean and install in one service.

We are a Service Disabled Veteran Owned Small Business working primarily on government bid projects and are proud of our contributions to significant buildings, facilities and venues across the state. We have experience in design-build projects, new construction and federal and public works projects. Today, we employ engineers and project managers overseeing a union workforce with dozens of commercial, infrastructure, and public works projects, including new construction, additions and alterations, and rehabilitation. TM Construction Hawaii is headquartered on Oahu and has worked on every island in Hawaii.
